

# WebVis Platform

VISIONA  
Space Technology

The WebVis Platform provides to the users, access to the latest satellite imagery with high and very high resolution available worldwide.

Using it, users have access to data collected by different sensors, with different images and solutions from different operators. In addition, you can choose between streaming and/or downloading options, all according to your needs.

## SATELLITES AVAILABLE ON THE PLATFORM

Bellow each satellite, you can find its spatial resolution.

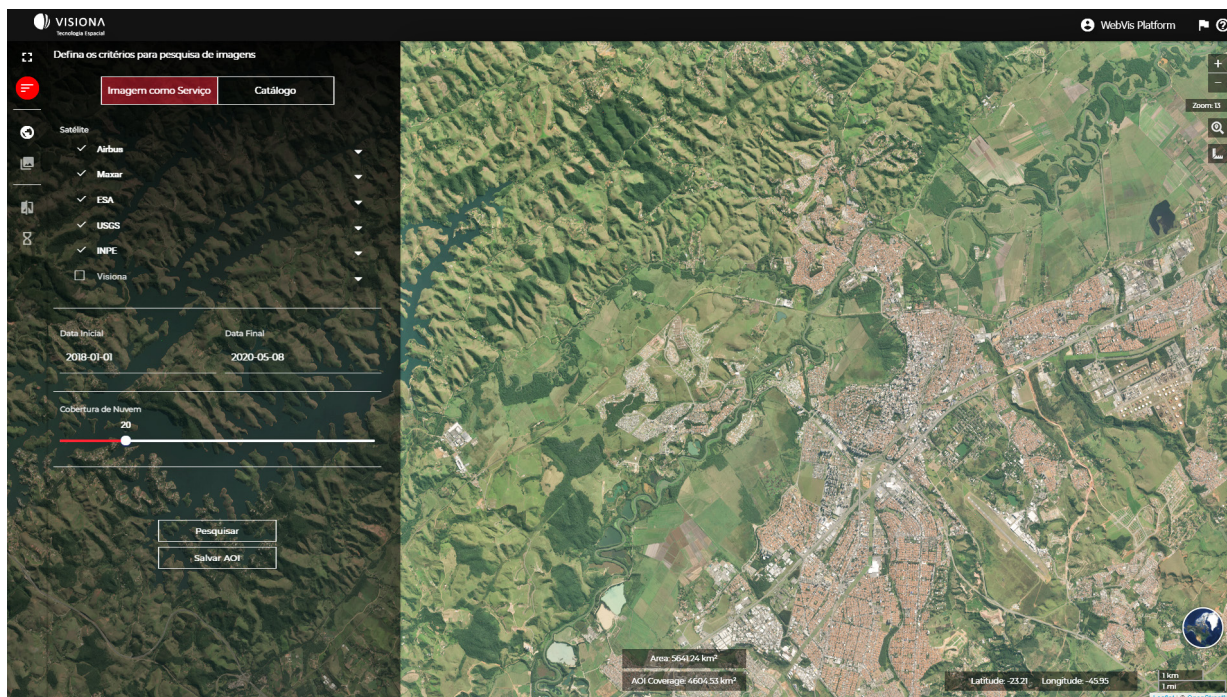

AIRBUS MAXAR
